

- A hygienic environmentally and user friendly fabric treatment developed and made in Australia. Healthguard has been proven and tested by Monash University Microbiology Department and comes with worldwide quality assurance including Oeko-Tex international registration. Healthguard is applied at the time of manufacturing.
- Healthguard maintains odour free surfaces by inhibiting the moulds which produce the smells. Also bio-degradable, non-carcinogenic and contains no heavy metals. It is classed as a non dangerous chemical.
- Its efficacy is shown to inhibit a wide range of micro organisms including bacteria, moulds, yeasts and algae. Most significant of which is its resistance to Staphylococcus aureus MRSA A129
- Healthguard also eliminates dust mites and wipes out their food sources. It continues to provide long term protection against dust mite pathogens that can cause allergies, asthma, psoriasis, rhinitis, sinusitis and even exzema.
- Healthguard's dual action will work for the useful life of the treated fabric. Resistant to sunlight.
